

xStore notification triggers: push and email

Backend handoff · as of 3 October 2026

Backend should send a notification on 48 events across buyers, vendors, couriers and package requesters; the 23 marked P0 are needed for launch because they move money or unblock the next step of a COD order.

48

events

23

P0 for launch

new types to add

Delivery rules

Push is for things the user must act on now; email is for anything they may need to find later (money, receipts, security). In Egypt many buyers rarely open email, so P0 money or time-critical events need an SMS (or WhatsApp) fallback when the push is not opened.

Channel	Use it for	Rule
In-app inbox	Every event in this document	Create the inbox row first; the push and email reuse its id and text
Push (FCM)	Real-time action: new order, status change, courier task	Always paired with an inbox row; tap opens the screen in the Tap column
Email	Receipts, money, approvals/rejections with reasons, security	Must stand alone without the app; include order number and EGP amounts
SMS / WhatsApp	Fallback for P0 events not opened within 15 minutes; OTP	Vendor new order, courier cash handover, store paused

Payload contract (the app already parses this)

- `data.type` = the notification type as a **string name**, e.g. `newOrder`. Numeric enum codes fall back to a generic announcement in the app today.
- `data.orderId` opens the order screen; `data.actionRoute` (a path starting with `/`, e.g. `/vendor-wallet`) opens any other screen; `listingId`, `reviewId` when relevant.
- `data.priority` = `low` / `normal` / `high` / `urgent` (string).
- Title and body in the user's app language (Arabic or English; every table gives both versions). Amounts as `EGP 1,250` in English and `1,250 ₪.ع` in Arabic.

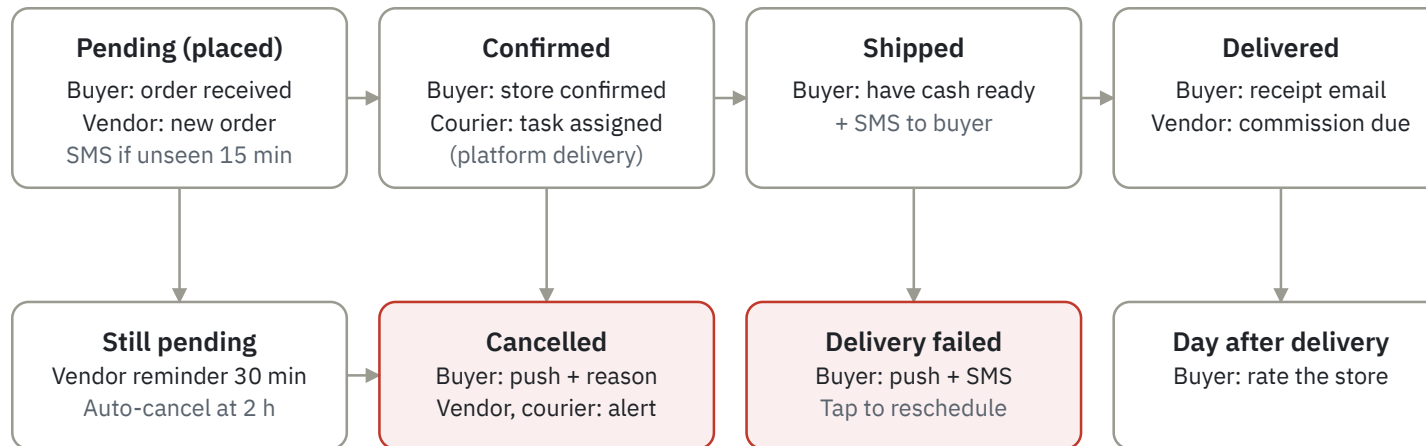

Guardrails

- Idempotency: one notification per (event, entity id, new status). Retries and repeated status updates must not double-send.
- Transactional and security messages always go out. Only the Growth section respects the marketing opt-out.
- Marketing quiet hours 22:00–09:00 Cairo time, max 1 per day and 3 per week per user.
- Respect the per-event toggles on the Notification settings screen once they sync to the backend (see Open questions).

Priority: P0 = needed for launch (blocks money or the next step) · P1 = first month after launch · P2 = later. **Type:** names tagged **new** must be added on both backend and app; the rest already exist in the app's `NotificationType`.

Order lifecycle at a glance

Every order status change tells someone what to do next

The top row is the happy path; red boxes are the outcomes that cost us money and need the reason in the message. The tables below give every event in full.

Buyer (consumer)

The buyer's biggest worry with COD is "is my order real and when do I need the cash ready". Every status change answers that, and cuts "where is my order" support calls.

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
Order placed successfully	Order #1042 received. Pay EGP 1,250 on delivery.	تم استلام طلبك رقم #1042. ادفع 1,250 ج.م عند الاستلام.	Push + Email (order summary)	P0	orderPlaced	/order/{id}
Vendor confirms the order	Ahmed Store confirmed your order #1042.	أكد متجر أحمد طلبك رقم #1042.	Push	P0	orderConfirmed	/order/{id}

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
Vendor rejects / order cancelled by vendor or admin	Order #1042 was cancelled: item out of stock. (always include the reason)	تم إلغاء طلبك رقم #1042: المنتج غير متوفر. (أرفق السبب دائمًا)	Push + Email	P0	orderCancelled	/order/{id}
Order picked up / out for delivery (status Shipped)	Your order is on the way. Please have EGP 1,250 ready.	طلبك في الطريق إليك. من فضلك جهّز 1,250 ج.م.	Push + SMS	P0	orderShipped	/order/{id}
Order delivered	Delivered! Thanks for shopping with xStore.	تم توصيل طلبك! شكرًا لتسوقك مع xStore.	Push + Email (receipt)	P0	orderDelivered	/order/{id}
Vendor has not confirmed within 2 hours	The store is still reviewing your order. We'll update you soon.	المتجر لا يزال يراجع طلبك. سنبلغك بأي تحديث قريبًا.	Push	P1	orderPending new	/order/{id}
Delivery attempt failed (buyer unreachable or refused)	We couldn't deliver order #1042. Tap to reschedule or contact us.	لم نتمكن من توصيل طلبك رقم #1042. اضغط لإعادة الجدولة أو تواصل معنا.	Push + SMS	P1	deliveryFailed new	/order/{id}
24 hours after delivery	How was your order? Rate Ahmed Store.	ما رأيك في طلبك؟ قيّم متجر أحمد.	Push	P1	reviewRequest new	/order/{id}
Vendor replies to the buyer's review	Ahmed Store replied to your review.	ردّ متجر أحمد على تقييمك.	Push	P2	reviewReply	/my-reviews
Report against a vendor is reviewed by admin	We reviewed your report on order #1042 and took action.	راجعنا بلاغك بخصوص الطلب رقم #1042 واتخذنا الإجراء اللازم.	Email	P2	reportResolved new	/order/{id}

Today a failed courier delivery is recorded as Cancelled. Business needs it as its own outcome: a refused COD order is a different problem (buyer fraud, vendor cost) from a vendor cancellation.

Vendor

Vendor speed is our conversion rate: an order that waits hours for confirmation gets cancelled or refused at the door. The wallet alerts protect our commission revenue before a store gets paused.

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
New order placed on the store	New order #1042 — EGP 1,250 COD. Confirm now.	طلب جديد #1042 — 1,250 ج.م دفع عند الاستلام. أكّده الآن.	Push (urgent) + Email; SMS if not opened in 15 min	P0	newOrder	/order/{id}

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
Order still Pending after 30 min (and again at 90 min)	Order #1042 is waiting. It auto-cancels in 30 min.	الطلب #1042 في انتظارك. سيُلغى تلقائيًا خلال 30 دقيقة.	Push + SMS	P0	orderConfirmReminder new	/order/{id}
Buyer cancels the order	Buyer cancelled order #1042. Don't ship it.	ألغى المشتري الطلب #1042. لا تقم بشحنه.	Push	P0	orderCancelledVendor	/order/{id}
Platform courier assigned to a vendor's order	Courier Mohamed will collect order #1042 today.	المندوب محمد سيستلم الطلب #1042 اليوم.	Push	P1	courierAssigned new	/order/{id}
Order delivered (commission now due)	Order #1042 delivered. EGP 62 commission added to your wallet.	تم توصيل الطلب #1042. أُضيفت عمولة 62 ج.م إلى محفظتك.	Push	P1	paymentReceived	/vendor-wallet
Listing approved	Your listing 'iPhone 13' is live.	إعلانك 'iPhone 13' منشور الآن.	Push	P0	listingApproved	/listing/my
Listing rejected	'iPhone 13' was rejected: blurry photos. Fix and resubmit.	تم رفض 'iPhone 13': الصور غير واضحة. عدّل الإعلان وأعد إرساله.	Push + Email (reason)	P0	listingRejected	/listing/my
Stock hits the low-stock level / sells out	Only 2 left of 'iPhone 13'.	متبقى قطعتان فقط من 'iPhone 13'.	Push	P1	lowStock	/listing/my
Buyer leaves a review	New 4-star review on your store.	تقييم جديد 4 نجوم على متجرك.	Push	P1	newReview	/my-reviews
Outstanding commission crosses the warn threshold	You owe EGP 800 commission. Pay before EGP 1,000 to keep selling.	عليك عمولة 800 ج.م. ادفعها قبل أن تصل إلى 1,000 ج.م لتستمر في البيع.	Push + Email	P0	commissionWarning new	/vendor-wallet
Outstanding commission crosses the pause threshold (store paused)	Your store is paused until you settle EGP 1,000.	تم إيقاف متجرك مؤقتًا حتى تسدّد 1,000 ج.م.	Push + Email + SMS	P0	storePaused new	/vendor-wallet
Admin approves a commission payment	Your payment of EGP 300 was approved.	تمت الموافقة على دفعتك بقيمة 300 ج.م.	Push + Email (receipt)	P0	commissionPaymentApproved new	/vendor-wallet
Admin rejects a commission payment	Payment of EGP 300 rejected: receipt unclear.	تم رفض دفعتك بقيمة 300 ج.م: الإيصال غير واضح.	Push + Email	P0	commissionPaymentRejected new	/vendor-wallet
Store unpaused after settlement	Your store is live again.	متجرك عاد للعمل من جديد.	Push	P1	storeResumed new	/vendor-wallet
Weekly, Sunday 10:00 Cairo	This week: 14 orders, EGP 9,400 sales, EGP 0 owed.	هذا الأسبوع: 14 طلبًا، مبيعات 9,400 ج.م، وعمولة مستحقة 0 ج.م.	Email	P2	weeklySummary new	/analytics

Proposed business rule for backend: auto-cancel a Pending order after 2 hours, and notify both sides with the reason.

Courier

Couriers hold our cash, so the handover alert is the most important courier message; assignment and cancellation alerts prevent wasted trips.

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
Admin assigns a marketplace order	New pickup: order #1042 from Ahmed Store, Nasr City.	استلام جديد: الطلب #1042 من متجر أحمد، مدينة نصر.	Push (urgent) + SMS	P0	courierOrderAssigned new	/deliveries
Admin assigns a package request	New package pickup: collect EGP 60 from sender.	طرد جديد للاستلام: حُصل 60 ج.م من المرسل.	Push (urgent) + SMS	P0	courierPackageAssigned new	/deliveries
Assigned order or package is cancelled or reassigned	Order #1042 cancelled. Don't pick it up.	تم إلغاء الطلب #1042. لا تستلمه.	Push (urgent)	P0	courierTaskCancelled new	/deliveries
Cash in hand reaches the handover threshold	You hold EGP 5,000. Hand it over before new COD orders.	معك 5,000 ج.م. سلّمها قبل استلام طلبات دفع عند الاستلام جديدة.	Push + SMS	P0	cashHandoverDue new	/courier-cash
Admin confirms a cash handover	Handover of EGP 5,000 confirmed.	تم تأكيد تسليم 5,000 ج.م.	Push	P1	cashHandoverConfirmed new	/courier-cash

Package delivery requests (Send a package)

The price step is the bottleneck: the request stalls until the requester confirms the admin's price, so that message is P0 and gets a reminder.

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
Admin prices the request	Your package delivery costs EGP 60. Confirm to book a courier.	تكلفة توصيل طردك 60 ج.م. أكّد لحجز مندوب.	Push + Email	P0	packagePriced new	/my-packages
Priced request not confirmed after 12 hours	Your price of EGP 60 is waiting for confirmation.	سعر التوصيل 60 ج.م في انتظار تأكيدك.	Push	P1	packagePriceReminder new	/my-packages
Courier assigned (request confirmed)	Courier Mohamed will pick up your package.	المندوب محمد سيستلم طردك.	Push	P1	packageConfirmed new	/my-packages
Courier picks up (cash collected)	Package picked up. EGP 60 paid.	تم استلام الطرد ودفع 60 ج.م.	Push	P1	packagePickedUp new	/my-packages

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
Package delivered	Your package was delivered.	تم توصيل طردك.	Push + Email (receipt)	P0	packageDelivered new	/my-packages
Admin cancels the request	Your package request was cancelled: area not covered.	تم إلغاء طلب توصيل الطرد: المنطقة خارج نطاق التغطية.	Push + Email	P1	packageCancelled new	/my-packages

The recipient at drop-off may not have the app. An SMS to the drop-off phone when the courier picks up ("A package is coming to you today") would cut failed deliveries (P2).

Account and security (all roles)

These are always sent, whatever the user's settings. Codes never go by push: a lock-screen preview would expose them.

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
OTP for sign-up, login, forgot password, email/phone verification	Your xStore code is 482913. It expires in 5 minutes.	رمز xStore الخاص بك هو 482913. صالح لمدة 5 دقائق.	SMS or Email only	P0	—	—
Password changed or reset	Your password was changed. Not you? Contact support.	تم تغيير كلمة المرور. لم تكن أنت؟ تواصل مع الدعم.	Email + Push	P0	securityAlert	/change-password
Account blocked / suspended by admin	Your account is suspended until 10 Oct: reason.	تم إيقاف حسابك حتى 10 أكتوبر: السبب.	Email + SMS	P0	accountSuspended new	—
Account registered	Welcome to xStore + how COD works (buyer) or how to list (vendor)	مرحبًا بك في xStore + كيف يعمل الدفع عند الاستلام (للمشتري) أو كيف تنشر إعلانك (للتاجر)	Email	P1	—	—
Login from a new device	New login on Samsung A54, Cairo.	تسجيل دخول جديد من Samsung A54، القاهرة.	Email + Push	P1	securityAlert	/settings
Email or phone verified / vendor verified	Your store is verified.	تم توثيق متجرك.	Push	P2	accountVerified	/profile

Growth and retention (opt-in)

These bring buyers back, but each one sent too often trains users to mute us, which kills the P0 messages above. They respect the marketing toggles, quiet hours and the frequency cap.

Event (backend sends when...)	Message (EN)	Message (AR)	Channels	Priority	Type	Tap opens
Wishlisted item price drops by 10% or more	'iPhone 13' dropped EGP 1,500.	انخفض سعر 'iPhone 13' بمقدار 1,500 ج.م.	Push	P1	priceDrop	/product/{id}
Wishlisted item is back in stock	'iPhone 13' is back in stock.	'iPhone 13' متوفر من جديد.	Push	P1	backInStock	/product/{id}
Admin launches a flash sale or promotion	Flash sale: 20% off electronics until midnight.	تخفيضات سريعة: خصم 20% على الإلكترونيات حتى منتصف الليل.	Push	P2	flashSale / promotionalOffer	actionRoute set by admin
Cart left unpurchased for 24 hours	You left 2 items in your cart.	تركت منتجات في سلتك.	Push	P2	cartReminder new	/cart
No app open for 30 days	New stores near you this week.	متاجر جديدة بالقرب منك هذا الأسبوع.	Email	P2	—	—
Admin system announcement (outage, policy change)	New delivery areas: Alexandria.	مناطق توصيل جديدة: الإسكندرية.	Push	P2	systemAnnouncement	/notifications

Open questions for backend

- Notification preferences:** the settings toggles (order updates, new orders, listing approved, low stock, promotions, push / email / SMS) are saved on the phone only. Can we add `GET/PUT /api/notifications/preferences` so the backend can respect them?
- Type format:** can the inbox API and FCM send `type` and `priority` as string names? Some records arrive as numbers today and show as generic announcements.
- SMS / WhatsApp provider:** which one, and what is the monthly budget? Needed for the P0 fallbacks.
- Email provider and sender domain** (e.g. `no-reply@xstore.eg`), plus Arabic and English templates.
- User language:** is the app language stored on the user so messages go out in Arabic or English?
- Failed delivery:** can we add a `DeliveryFailed` outcome instead of reusing `Cancelled`?
- Auto-cancel:** agree on 2 hours for unconfirmed Pending orders, or another limit.
- Cart reminders:** is the cart stored on the server? If it is only on the phone, the cart reminder is not possible yet.
- Scheduled jobs:** reminders (vendor confirm, package price, review request, weekly summary) need a scheduler. Which one will we use?
